AI Automation Portfolio

Projects:

1. Customer Support Chatbot (Voiceflow)

Problem: Small businesses spend hours answering repetitive customer queries.
Solution: Built a Voiceflow chatbot that handles customer questions, appointment settings and customer service
Tools: Voiceflow, integrated with calendly for appointment setting, re and airtable for customer logging, reviews, and support.
Outcome: increase leads, increase customer retention, decrease lost appointments, increase customer rapport
Demo:

https://drive.google.com/file/d/1tQ_YXyN87lxfEXFFYWW76y0RImLn7B9-/view?usp=sharing

2. Automated customer update messaging w/Telegram (n8n)

Problem: Customer retention, customer rapport, business reputation
Solution: Created an n8n workflow to automate customer update with messages. In this example I use a healthupdate as an example to demonstrate the workflow process and functionality.Workflow can be custom tailored to company desires.

Tools: n8n, Google Gemini, Telegram API.
Outcome: Workflow successfully connects an AI Agent to Google Gemini sending an automated update message to the user's Telegram Account.

Demo:

3. Email Campaign Automation (Make.com)

Problem: Customer communication and rapport. Business reputation
Solution: Created an n8n workflow to automate customer update with messages. In this example I use crypto data
to update a fictional user about the current price of bitcoin.
Tools: n8n, Coinmarketcap API, Telegram API.
Outcome: Automated daily crypto updates.

4. Phone Number Scraper

Problem: Lead Capture
Solution: Create a phone number to scrape phone numbers from a website using scrapeninja api.
Tools: n8n, MAKE.com, scrapeninja api
Outcome: Generates leads by scraping and retrieving phone numbers of potential clients

5. Automated X/Twitter relay from Telegram (n8n)

Problem: Client looking for more convenient update marketing tool through preferred app (Telegram)
Solution: Created an n8n workflow to automate X/twitter updates from within the Telegram app
Tools: n8n, X API, Telegram API
Outcome: Convenient way for client to update existing and potential customers.

Song Idea Generator(Non-Automation):

Description A Java Swing app: Generates random C-major melodies with mood-based pitch bias (e.g., "happy" for uplifting notes) and varying rhythms (quarter/eighth notes), then plays them via MIDI synth with a simple GUI (mood selector + play button). Procedural fun for creative sparks, expandable to lyrics or exports.
